- **12:10 - 12:30:** LIGO (Paul H.)
- **12:30 - 12:50:** EISCAT_3D (Ingemar)
- **12:50 - 13:10:** EPOS (Mariusz)

- **14:00 - 15:00:** Updates from T4 (Simone)

- **15:30 - 17:00:** Hands-on session with LifeWatch / discussion on specific topics

Work done so far in SA1

1. Interviews with communities

2. Pilot intake forms

3. Online discussions

4. Offline discussions

   • AARC F2F in Amsterdam (November)

   • DI4R in Brussels (December)

   • SA1 Plug-fest in Utrecht (February)

5. Implementation

How to implement AAI for research communities, a modest approach

1

Research communities
having AAI needs

Some observations so far

1. 8 communities is a lot (too much?)

    • Also, they have their own timelines

2. Due to AARC, AAI is integrated into (community) practices early on

    • Very valuable!

3. F2F sessions are **essential**

    • Another plug-fest in Q3/Q4: focus on demo's / operational models (?)

One more thing… Homework!

Results of Pilots with New Communities Part 1 (DSA1.1)

Thank you
